

```
// returns the area of the land tract
public double Area() {
    return length * width;
}
```

Instance Method

```
// Compares one land tract to another and returns the size as an integer.
public int equals(LandTract lt) {

    if (this.Area() > lt.Area()) {
        return 1;
    } else if (this.Area() < lt.Area()) {
        return -1;
    } else {
        return 0;
    }
}
```
